

DIBUTYLINDILAUATE (DBTDL)

1. Basic Information

Product Name	Dibutylindilaurate
Structural Formula	
Molecular Formula	C ₃₂ H ₆₄ O ₄ Sn
CAS No.	77-58-7
Application	DBTDL is used as heat stabilizer for PVC and as catalyst at the manufacturing of polyurethane and silicone sealants / foam. In crosslinking silan-based systems for polyolefines it is used also as catalyst.

2. Specifications

Items	Specification
Appearance	Yellow liquid
Tin content	18.0-19.0%
Moisture	<0.4%
Colour	<300

3. Additional Information

Available packaging	25KG / 200KG drums or IBC
