Section 4: First aid measures

4.1 Description of first aid measures

Inhalation

Move the exposed person to fresh air. If breathing stops, provide artificial respiration.

SULPHURIC ACID 98%

Eye contact

Rinse immediately with plenty of water for 15 minutes holding the eyelids open. Seek medical attention

Skin contact

Remove all contaminated clothes and footwear immediately unless stuck to skin. Wash off immediately with plenty of soap and water. Seek medical attention if irritation or symptoms persist.

Ingestion

DO NOT INDUCE VOMITTING. Never give anything by mouth to an unconscious person. Rinse mouth thoroughly. Seek medical attention.

General information

If you feel unwell, seek medical advice (show the label where possible).

Section 5: Fire-fighting measures

5.1 Fire Fighting Media and Instructions:

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

5.2 Special hazards arising from the substance or mixture

No data available.

5.3 Advice for firefighters

Wear suitable respiratory equipment when necessary.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Wear suitable protective clothing. Avoid breathing vapours, mist or gas. Avoid formation of dust. Ensure adequate ventilation of the working area. Evacuate personnel to a safe area.

6.2 Environmental precautions

If safe to do so, prevent further leakage or spillage. Do not let product enter drains.

6.3 Methods and material for containment and cleaning up

Avoid raising dust. Sweep up. Transfer to suitable, labelled containers for disposal.

Section 7: Handling and storage

7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice. Never carry a bottle by its top. Avoid formation of dust. Ensure adequate ventilation of the working area.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a cool, dry and well-ventilated area. Keep in properly labelled containers. General principles of chemical storage: Store the minimum stock levels of hazardous chemicals, always disposing of chemicals that are no longer required. Store large breakable containers, particularly of liquids, below shoulder height. Ensure containers and bottle tops are sealed properly to avoid unnecessary leakage of vapours. Ensure hazard labels are clear and never store in direct sunlight.
