

Tungsten Powder

1. Basic Information

Product Name	Tungsten Powder
Structural Formula	
Molecular Formula	W
Molecular Weight	183.84 g/mol
CAS No.	7440-33-7
EINECS	231-143-9

2. Specifications

Characteristics	Specification
Appearance (Colour), Grey	Conforms to Requirements
Appearance (Form)	Powder
Average Particle Size Typically 12.00 to 14.00 Microns	-
ICP Major Analysis Confirms Tungsten Component	Confirmed
Purity 99.9% Purity Based On Trace Metals Analysis	Conforms
Trace Metal Analysis	≤ 1500.0 ppm

3. Additional Information

N/A
